

HOOK LIFT

BODYBUILDING MADE EASIER!

Tailormade for your application with best preparations available.

Truck specification Chassi: G 410 B6x2*4NA Cab: CG17L

Plough control on armrest (FFU) FPC7072

Operation unit with armrest fitted on the driver's seat. The operation unit is equipped with two levers for controlling a snow plough at the front and a snow plough on the side. The float position of the snow ploughs is controlled using two separate switches. Bodybuilder tube across IP C* All trucks are supplied with an empty tube inside the instument panel, dedicated for the bodybuilder.

Cable harness FPC3314 Extra harness for additional switches.

Tipper control switches

Makes it possible to have

activate e.g. the hydraulic

valve that raises or lowers

the tipper body on the truck

and/or trailer. A switch that

is included as standard.

works as an emergency stop

switches in the cab to

Preparation for auxiliary headlamp FPC1854

Preparation for additional headlamps comprises harnessto-harness connectors behind the front grille panel for high headlamp position. This preparation is designed for additional headlamps (incl. direction lights) when the regular headlamps are obscured by front mounted equipment such as a snowplough.

Instrument panel control lights BB FPC3888

There are many options for the bodywork to provide the driver with information, 8 lamps, sound and display messages in the instrument cluster. The lamps can indicate with different colours.

CAN switches FPC6793

headlights are

protected by

a steel grille.

The

Spaces in the instrument panel are reserved for extra switches that are programmed in the BCI control unit. **Preparation working lamp side below cab FPC4742** Preparation for work lights aimed backwards on the left and right-hand sides below the cab. Controlled with a switch on the door panel.

12m

3x7 pole electrical preparation from cab FPC2411

Pre-routed cable harness from the bodywork's central electric unit that is terminated with a DIN connector on the frame nuder the cab. 1, 2 or 3 pieces with 7 poles in each (containes different types of 1,5mm2, 2,5mm2 and CAN cables).

BB electrical supply 150A continually, 250A max B*

All trucks are supplied with a dedicated electrical output, conviniently located behind the mudguard of the 1st front axle.

BB brackets (flexible/with holes/for welding) FPC3303

3x7 poles BB cables (in cab

Three 7-pin extension cable.

3 different lenghts; 2m, 8m or

storage RHS) FPC3023

Scania can offer many different body attachment brackets to suit a variety of applications. The bodywork is bolted into the upper row of holes on the bracket.

Body work holes in frame, pre punched top row FPC7432 Frame prepared with an upper row of holes. The holes are spaced at 50 millimetres and are used to attach the bodywork to the frame of the truck.

*Always on truck

Cable	harnesses in	cab roof FPC3024
Extra harnesses for	bodybuilder i	nstalled in cab roof.

Beacon FPC1330

Mounted on a robust aluminium bar, the rotating beacon supplies efficient warning light.

Roof rails FPC1401

The roof rails are in aluminium which simplifies the fitting of an air deflector, roof rack and other extra equipment.

Working lamps rear wall cab top FPC5900

The work light consists of two LED headlamps fitted on the left and right-hand sides of the rear cab wall.

EG PTO preparation FPC3502

The electric preparation includes routed wiring for activation of an EG power take-off.

Hydraulic pump FPC4801

With hydraulic pump for bodywork. Pump type and pump volume can be selected fit different needs/applications.

BCI Bodywork communication interface FPC5837

BCI is a programmable interface between the truck and bodywork facilitating communications between truck and bodywork. The BCI can be programmed with advanced logics for safety and other operational funtionality in the bodywork.

ED preparation for hydraulic pump FPC4827A

The engine is supplied prepared for power take-off. Consists of an intermediate gear which is fitted in the flywheel housing.

Air supply inside frame A*

A dedicated outlet for BB needs of air is included on every chassis. This is the one and only place allowed to connect air supply to bodywork.

BB brackets (flexible/with holes/for welding) FPC3302 Scania can offer many different body attachment brackets to suit a variety of applications. The bodywork is bolted into the upper row of holes on the bracket.

Mudguards rear axles

Mudguards made of hard

plastic designed for the

rear axle/axles.

FPC164

Rear overhang in 10mm steps FPC1537

Scania can deliver a perfect adapted overhang to every bodywork within 10 mm steps.

Air and electrical prep to trailer FPC1556 Trailer connections can be specified in Continental or Nordic versions.

Draw beam incl. coupling FPC1536

Scania drawbeams have hole layouts that allow a drawbeam, under-run protection and body adaptation brackets to be mounted in a wide variety of positions. This makes it unnecessary to drill additional holes in the frame side members.

Tail lamp protection FPC4754

The robust rear light protection is suitable for trucks operating in tough conditions.

Working lamp frame end, left-hand and righthand side FPC4743

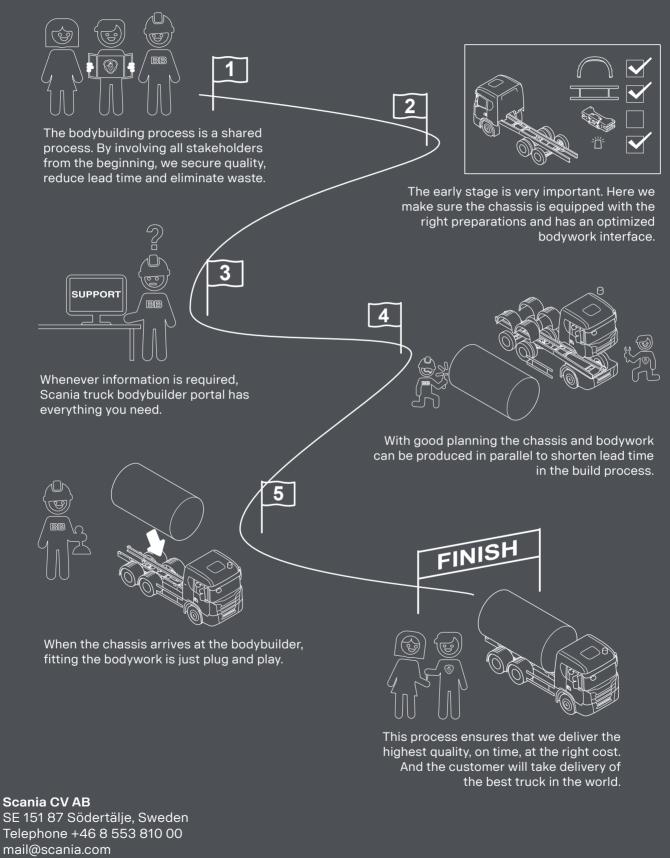

Work light at rear end of frame, on left and righthand side. Controlled with a switch on the door panel.

Trailer coupling FPC1540

A towing unit (coupling) is required in order to tow a trailer after the truck. The towing unit is fitted in the truck's drawbeam and both must withstand the forces that arise.

Rear underrun protection RUP FPC1539 Rear underrun protection available in 3 different styles/executions.

The bodybuilding process "Together we can make the best trucks in the world"
