Tailormade for your application with best preparations available.
Concrete

**Truck specification**

**Chassi:** G 410 B8x4NZ  
**Cab:** CG17L

**BCI Bodywork communication interface FPC5837**  
BCI is a programmable interface between the truck and bodywork facilitating communications between truck and bodywork. The BCI can be programmed with advanced logics for safety and other operational functionality in the bodywork.

**Bodybuilder tube across IP C**  
All trucks are supplied with an empty tube inside the instrument panel, dedicated for the bodybuilder.

**Instrument panel control lights BB FPC3888**  
There are many options for the bodywork to provide the driver with information. 8 lamps, sound and display messages in the instrument cluster. The lamps can indicate with different colours.

**Bodywork programmable switches preparation FPC7682**  
Enables the BCI control unit to be programmed with the BICT tool for Pushbutton BCI reserved quantity (06793) switches.

**CAN switches FPC6793**  
Spaces in the instrument panel are reserved for extra switches that are programmed in the BCI control unit.

**3x7 pole electrical preparation from cab FPC2411**  
We can offer 3 different solutions of electrical preparations. 1, 2 or 3 pieces with 7 poles in each (contains different types of 1,5mm2, 2,5mm2 and CAN cables). Extension cable FPC 3023. Lenght: 2, 8 or 12 meter, delivered inside cab.

**BB electrical supply 150A continually, 250A max B**  
All trucks are supplied with a dedicated electrical output, conveniently located behind the mudguard of the 1st front axle.

**Mudguards 2nd front axle FPC4050**  
The mudguard on the second front axle is height-adjustable. It is supplied from the factory in the highest position, but can be easily adjusted to three different positions to fit with the bodywork and tyres.

**Air supply inside frame A**  
A dedicated outlet for BB needs of air is included on every chassis. This is the one and only place allowed to connect air supply to bodywork.

**Side marker lights FPC313**  
Different numbers of lamps are supplied depending on the length of the vehicle. These are available temporarily or permanently mounted.

**BB brackets (flexible/with holes) FPC3303**  
Scania can offer many different body attachment brackets to suit a variety of applications. The bodywork is bolted into the upper row of holes on the bracket.

**Body work holes in frame, Pre punched top row FPC 7432**  
Frame prepared with an upper row of holes. The holes are spaced at 50 millimetres and are used to attach the bodywork to the frame of the truck.

**Rear overhang in 10mm steps FPC1537**  
Scania can deliver a perfect adapted overhang to every bodywork within 10 mm steps.

**Beacon FPC1330**  
Mounted on a robust aluminium bar, the rotating beacon supplies efficient warning light.

**Working lamps rear wall cab top FPC9000**  
The work light consists of two LED headlamps fitted on the left and right-hand sides of the rear cab wall.

**EG PTO clutch independant power take-off FPC6392**  
The power take-off can only be used when the clutch pedal is released.

**EG PTO preparation FPC3502**  
The electric preparation includes routed wiring for activation of an EG power take-off.

**Tail lamp protection FPC4754**  
The robust rear light protection is suitable for trucks operating in tough conditions.

**Working lamp frame end, left-hand and right-hand side FPC4743**  
Work light at rear end of frame, on left and right-hand side. Controlled with a switch on the door panel.

**Draw beam FPC1536**  
Scania drawbeams have hole layouts that allow a drawbeam, under-run protection and body adaptation brackets to be mounted in a wide variety of positions. This makes it unnecessary to drill additional holes in the frame side members.

**Bodywork programmable switches preparation FPC7682**  
Enables the BCI control unit to be programmed with the BICT tool for Pushbutton BCI reserved quantity (06793) switches.

**Hydraulic pump FPC4801**  
With hydraulic pump for bodywork. Pump type and pump volume can be selected fit different needs/applications.

**Mudguards rear axles FPC164**  
Mudguards made of hard plastic designed for the rear axle/axles (not recommended if customer sprays form oil on back of truck).

**Working lamp frame end, left-hand and right-hand side FPC4743**  
Work light at rear end of frame, on left and right-hand side. Controlled with a switch on the door panel.

**Draw beam FPC1536**  
Scania drawbeams have hole layouts that allow a drawbeam, under-run protection and body adaptation brackets to be mounted in a wide variety of positions. This makes it unnecessary to drill additional holes in the frame side members.

**Roof rails FPC1401**  
The roof rails are in aluminium which simplifies the fitting of an air deflector, roof rack and other extra equipment.

**BB brackets (flexible/with holes) FPC3412**  
Scania can offer many different body attachment brackets to suit a variety of applications. The bodywork is bolted into the upper row of holes on the bracket.

**3x7 pole electrical preparation from cab FPC2411**  
We can offer 3 different solutions of electrical preparations. 1, 2 or 3 pieces with 7 poles in each (contains different types of 1,5mm2, 2,5mm2 and CAN cables). Extension cable FPC 3023. Lenght: 2, 8 or 12 meter, delivered inside cab.

The bodybuilding process
“Together we can make the best trucks in the world”

1. The bodybuilding process is a shared process. By involving all stakeholders from the beginning, we secure quality, reduce lead time and eliminate waste.

2. The early stage is very important. Here we make sure the chassis is equipped with the right preparations and has an optimized bodywork interface.

3. Whenever information is required, Scania truck bodybuilder portal has everything you need.

4. With good planning the chassis and bodywork can be produced in parallel to shorten lead time in the build process.

5. When the chassis arrives at the bodybuilder, fitting the bodywork is just plug and play.

FINISH

This process ensures that we deliver the highest quality, on time, at the right cost. And the customer will take delivery of the best truck in the world.
