TANK BULK

BODYBUILDING MADE EASIER!

Tailormade for your application with best preparations available.
**Tank bulk**

**Truck specification**

**Chassi:** R 500 B6x2NB

**Cab:** CR20H

- **Cable harnesses in cab roof FPC3024**
  - Extra harnesses for bodybuilder installed in cab roof.

- **Bodybuilder tube across IP C**
  - All trucks are supplied with an empty tube inside the instrument panel, dedicated for the bodybuilder.

- **Tipper control lever (air) FPC4666**
  - Control lever in the cab for activating the hydraulic valve that raises or lowers the tipper body on the truck.

- **Instrument panel control lights BB FPC3888**

- **CAN switches FPC6793**
  - There are many options for the bodywork to provide the driver with information, 8 lamps, sound and display messages in the instrument cluster. The lamps can indicate with different colours.

- **Cable harness FPC3314**
  - Extra harness for additional switches.

- **BB electrical supply 150A continually, 250A max B**
  - All trucks are supplied with a dedicated electrical output, conveniently located behind the mudguard of the 1st front axle.

- **Body work holes in frame, pre punched top row FPC7432**
  - Frame prepared with an upper row of holes. The holes are spaced at 50 millimetres and are used to attach the bodywork to the frame of the truck.

- **Draw beam inst. coupling FPC1536**
  - Scania drawbeams have hole layouts that allow a drawbeam, under-run protection and body adaptation brackets to be mounted in a wide variety of positions. This makes it unnecessary to drill additional holes in the frame side members.

- **End beam FPC4341**
  - Vehicles that do not have drawbeam, tow beam or any other type of crossmember mounted at the rear of the frame must be fitted with an end beam.

- **Rear underrun protection RUP FPC1539**
  - Rear underrun protection available in 3 different styles/executions.

- **Preparation working lamp side below cab FPC4742**
  - Preparation for work lights aimed backwards on the left and right-hand sides below the cab. Controlled with a switch on the door panel.

- **Air supply inside frame A**
  - A dedicated outlet for BB needs of air is included on every chassis. This is the one and only place allowed to connect air supply to bodywork.

- **BB brackets (flexible/with holes/for welding) FPC3303, FPC3302**
  - Scania can offer many different body attachment brackets to suit a variety of applications. The bodywork is bolted into the upper row of holes on the bracket.

- **Tail lamp protection FPC4754**
  - The robust rear light protection is suitable for trucks operating in tough conditions.

- **Working lamp frame end, left-hand and right-hand side FPC4743**
  - Work light at rear end of frame, on left and right-hand side. Controlled with a switch on the door panel.

- **Trailer coupling FPC1540**
  - A towing unit (coupling) is required in order to tow a trailer after the truck. The towing unit is fitted in the truck’s drawbeam and both must withstand the forces that arise.

*Always on truck*
The bodybuilding process
“Together we can make the best trucks in the world”

1. The bodybuilding process is a shared process. By involving all stakeholders from the beginning, we secure quality, reduce lead time and eliminate waste.

2. The early stage is very important. Here we make sure the chassis is equipped with the right preparations and has an optimized bodywork interface.

3. Whenever information is required, Scania truck bodybuilder portal has everything you need.

4. With good planning the chassis and bodywork can be produced in parallel to shorten lead time in the build process.

5. When the chassis arrives at the bodybuilder, fitting the bodywork is just plug and play.

FINISH

This process ensures that we deliver the highest quality, on time, at the right cost. And the customer will take delivery of the best truck in the world.
