Below you will find the latest information that is important to know when bodybuilding on a Scania vehicle.

For Scania contact in bodybuilding issues, see:

<https://bodybuilder.scania.com/trucks/en/help/market-contacts.html>

## THE BODYBUILDER PORTAL IS UPDATED

The bodybuilder portal that contains the instructions and information needed for bodybuilding on a Scania truck is now updated. To make it easier to find the information needed for bodybuilding, the information has been restructured as well as divided and grouped in an more intuitive way.

The search function has been improved thanks to the fact that the pdf-format is used to a lesser extent, which means that a greater proportion of information is covered by the search. Use the search function to easily find the information you are looking for.

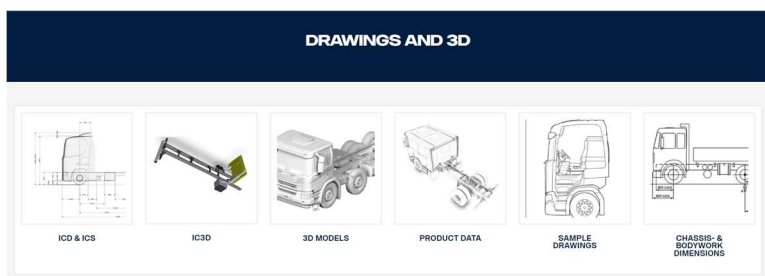

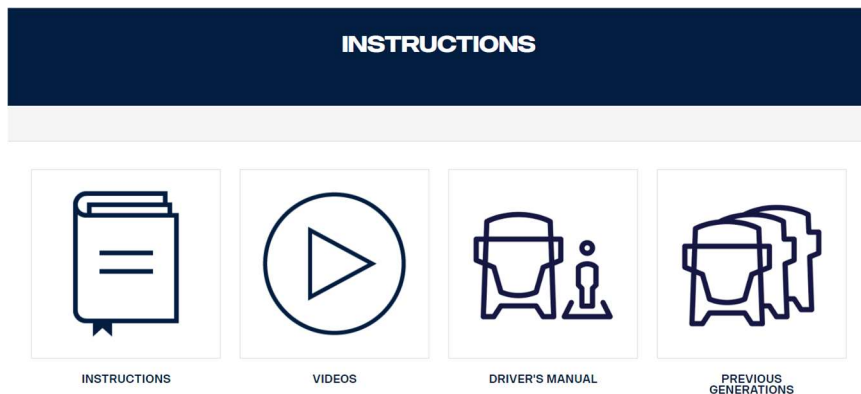

In the "Requirements" tab; General requirements are gathered under "Use and responsibility, legal requirements". This is where you find the "must know" before bodybuilding or converting a Scania truck and the responsibility you as a bodybuilder have when bodybuilding on a Scania truck. It is highly recommended for anyone handling bodybuilding or conversions on Scania trucks to in detail study the "Use and responsibility, legal requirements" section.

**RULES, RESPONSIBILITY AND LEGAL REQUIREMENTS**

					
<b>USE AND RESPONSIBILITY, LEGAL REQUIREMENTS</b>	<b>MULTI-STAGE COOPERATION AGREEMENT PROCESS</b> DESCRIPTION → APPLICATION FORM EC WVTA →	<b>SCANIA CERTIFICATES</b>	<b>SCANIA STANDARDS</b>	<b>CO2 AND COC</b>	<b>SCIP</b>
Here you find information about the laws and regulations that apply to heavy-duty trucks:	To access Scania's certificates, you must sign the Multi-stage cooperation agreement (EU) 2018/858	On the following page, we collect all the truck certificates that affect bodybuilders:	On the following page, we gather some of Scania's standards which are useful for bodybuilders:	Information on the calculation of fuel consumption and emissions of carbon dioxide can be found here:	Information on how to report products containing dangerous substances together with Scania CV new portal for submission of SCIP ID.

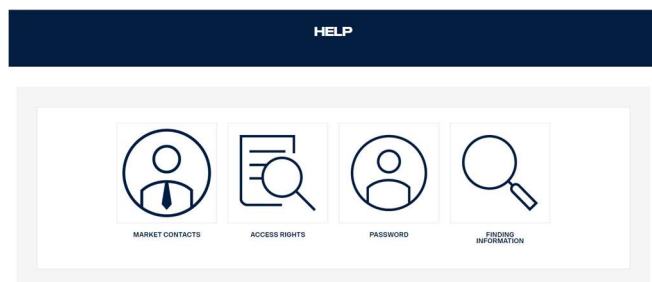

Instructions are gathered under the “Instruction” tab; with the “Instructions” as the main information. Nowadays all information regarding a specific component, for instance pneumatic system, is located together for easy access to the relevant information.

Drawings and data is gathered in the “Drawings and 3D” tab; In “Product data” you find chassis information and vehicle dimensions for instance distance between cab and bodywork as well as cab tilting information.

In the “Factory fitted options” tab you find the Application sheets showing useful preparations and options to facilitate bodybuilding. The Option tab is under progress and will later include links to the information regarding preparations and options that already are available in the Instructions tab.

In the Help tab you find the Market contacts and how you handle your Password as well as other administrative information.
